SUMMARY OF EXAMINER INTERVIEW

Applicants would like to thank the Examiner for participation in an interview on March 27, 2008, and for considering arguments regarding the deficiencies of the prior art, including the den Dunnen and DNA Star references. During the interview, claims 1, 29, 34, 46, and 51-54 were discussed. The Examiner indicated that describing "discrete elements" to include a patient identification value, as presented in claim 4, appears to overcome the cited references. As such, the Applicants have herein amended independent claims 1, 29, 34, 46, and 51-54 accordingly.
